

The STELLAR Approach

SPARK: Short, intensive, activity based courses, summer schools and workshops that will add market understanding in health and ageing and I&E skills.

TRANSFORM: Entrepreneurship Lab and Innovation Fellowships are intensive, activity based learning concepts using real healthcare problems to develop creative skills and competencies to craft marketable solutions.

EMBRACE embeds business education in current and new MSc and PhD programmes by combining research and innovation in collaboration with industry.

LEAD combines business schools with Europe's leading ageing centers to provide decision makers with knowledge of emerging trends in health and ageing.

LEAP will use digital learning and MOOCs serving as a gateway for wider public engagement and outreach.

AMPLIFY will establish alumni networks that match new innovators with successful entrepreneurs and new projects to amplify the impact of the KIC

REWARD The InnoLife Prize for excellence of student driven projects.
