

How to fill in the learning outcome form

All course goals are listed on the learning outcome form. You and the subject reader will go through the form twice.

Before submitting your application, you and the subject reader will look at the project plan and the goals stated on the learning outcome form and ensure that all goals can be achieved by doing the proposed project. If you think so, you check the boxes in the left column, and you both sign at the bottom left.

At the end of the project, usually after the presentation when your subject reader is ready to approve the report, you will go through and make sure that the goals were actually met. If they were, you check the boxes in the right column and sign at the bottom right.
