

UPPSALA
UNIVERSITET

Student certificate concerning later publication of degree project with confidentiality - technical masters in bioinformatics and molecular biotechnology

The certificate is handed in, completed and with a signature, to the coordinator at the latest at the final presentation of the project.

All degree projects for technical masters are archived in Uppsala University's digital archive DiVA. If the report has confidentiality it is archived without being searchable.

After the confidentiality agreement is expired, however, we think it's nice if you decide to publish your report. For the coordinator to be able to help you with this, we want you to fill in the following certificate.

I give my permission to the examiner/coordinator to publish the thesis in DiVA after the end of confidentiality, which means that the work may be published (YYYY-MM): _____

The report should not be published.

Your name: _____

Your personal identity number: _____

_____/_____20____

Date

Signature
